

Est. 1999

## **Celebrating over 10 Years of teaching.**

**cubetuition** is run by two qualified and experienced teachers - Viv Yankah and Sue Hovell. We work in small classes of 12, allowing each pupil to receive individual attention. The curriculum is structured around the needs and abilities of each child to help them build their confidence, develop their learning skills and achieve their potential. To help achieve this, please inform us of any specific areas of concern you may have about your child.

**cubetuition** offer the following areas of tuition:

- **comprehension/grammar/spelling/reading**
- **mathematics/problem solving**
- **verbal and non-verbal reasoning**
- **study skills**
- **general knowledge**
- **prep for 11+ exams**
- **English, Maths and study skills for Secondary School students**

Every lesson is carefully structured around the needs of each child, enabling them to work at their own pace and to develop life-long learning skills in an atmosphere that is both stimulating and encouraging. Viv Yankah explains further: "The class environment is both relaxed and enjoyable which means our pupils look forward to their lessons, as many of our parents have commented upon."

Our classes have a maximum number of twelve children enabling us to identify any problem immediately and to accommodate individuals who may require specific help. We encourage group work and discussions, as well as the one-to-one tuition we provide for each pupil throughout the course of the class. We work towards achievable goals with the children, helping them to reach their full potential and enjoy the new-found confidence this brings.

During the holidays we also run English, Maths and Reasoning courses. Early booking is advisable for all these courses. As Sue Hovell adds, "Our strengths lie in our passion and enthusiasm for life-long learning. We also pride ourselves on excellent communication with all our parents."

**Help them to help themselves.**

**Telephone us now to book your FREE trial lesson.**

For more information, please telephone us, we would be delighted to discuss your child's needs with you.
